

ArcelorMittal

Granite[®] HDXtreme

Extremely beautiful, extremely durable

Granite[®] HDXtreme is the latest pre-painted steel in ArcelorMittal's organic coated Granite[®] range.

It has a coating system that provides the best level of protection against UV and corrosion, for roofs and facades on buildings in coastal locations. Performance is guaranteed for up to 40 years.

Created in consultation with architects and designers, Granite[®] HDXtreme is available in 50 colours and three different finishes: satin, matt and sparkling.

Free of chromates and heavy metals, 100% recyclable, Granite[®] HDXtreme is also available with a low CO₂ footprint as XCarb[®] recycled and renewably produced steel, made from recycled steel and 100% renewable electricity.
